

# BASIC MSUS COURSE

Theoretical lectures and demonstrations followed by hands-on training

DECEMBER 9-10, BRUSSELS | BELGIUM

Dear colleagues,

The basic course aims to teach musculoskeletal ultrasound and is designed to improve the practice of ultrasound examinations.

For that purpose, the key anatomic structures are discussed for each joint and emphasis is placed on training each participant individually in practical sessions. This is guaranteed by the presence of experienced teachers and by the limited number of participants (max. 32) accepted for each training session.

We look forward to welcoming you in Brussels!
